Proposed Bus Stop Consolidation

2025 Better Bus Network

As part of the proposed 2025 Better Bus Network, Metro is taking this opportunity to review and consolidate bus stops across the region to make service faster and more direct. We are proposing to eliminate approximately 650 bus stops, which is about 7% of the bus stops that Metrobus serves.

Metro used our Board adopted [Service Guidelines](#), which provide guidelines of the average number of bus stops per mile for different kinds of service. We focused on stops that were about 660 feet apart or less and then assessed ridership at the stop and the availability of safe access for customers. For stops that were close together with low ridership or without safe pedestrian access were considered for consolidation.

The list of stops proposed for elimination is shown below. Comments on these stops can be provided at wmata.com/betterbus as part of the larger engagement effort. In the “Comment on Your Route” tool, you can also view the remaining closest bus stop to your origin or destination. If you would like to find additional information on a specific stop in our current network, please go to [busETA \(wmata.com\)](http://busETA.wmata.com).
